NETTUNO TAKES CARE OF WORKER'S HANDS

REDUCE THE RISK OF DISEASES
AND SKIN DISORDERS HAS NEVER
BEEN EASIER!

The risk of illnesses related to repeated contact with harmful, irritating or hazardous chemicals is often underestimated, but it is a source of accidents and disorders for many workers employed in a wide variety of economic sectors.

Today, thanks to Protex range creams we are able to offer the **most effective prevention**. Furthermore, when combined with our **Skin Care Programme** board, which can be adapted to any operating context, our products represent a valid programme for **protecting, washing and caring** for working hands.

Skin is the largest human organ.

It protects the body from mechanical, chemical and thermal stress, mitigates the harmful effects of sunlight and repels microorganisms. It also regulates the body's temperature and acts as a store for fats, carbohydrates, water and salts.

Materials such as surfactants and organic solvents loosen the constituents of the stratum corneum (the outermost layer of the skin) and impair its barrier function. Due to this damage, the skin loses more and more water, dries out and becomes rough and cracked, facilitating the absorption of potential allergens and hazardous substances.

A healthy stratum corneum regenerates itself continuously, but repeated irritations also impair its ability to heal itself.

For this reason, **it is important to take measures of protection from the beginning of professional exposure.**

There is no universally valid protective agent: each **attack agent corresponds to the appropriate protection.**

Knowing the hazardous substances to which the skin is exposed is the first step towards conscious, effective and lasting protection.

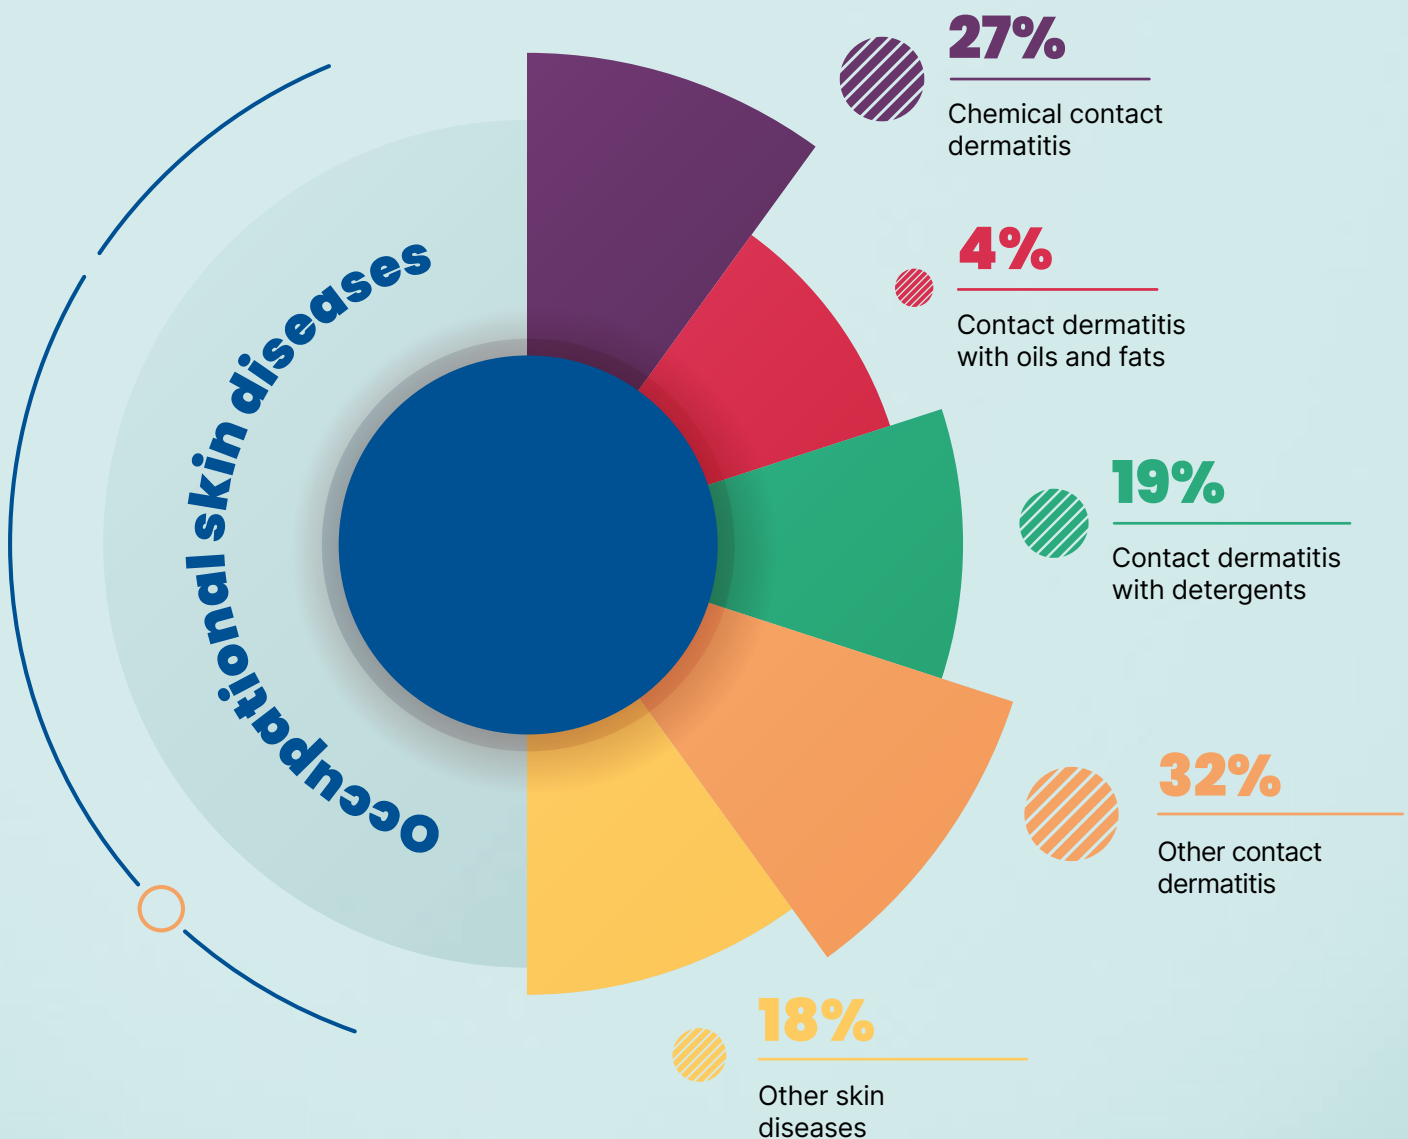

Why use Protex barrier creams?

PREVENTION, THE BEST CURE

It is not said enough: **inadequate hand protection** in the workplace can lead to very serious health consequences.

Manual work, both in industry and in the personal services sector, often exposes workers to **repeated contact with potentially harmful substances**, but this risk is often not properly perceived.

INAIL (the Italian Institute for Insurance against Accidents at Work/surveys) show that the lack of adequate skin protection in the workplace is one of the main causes of dermatitis and other skin disorders. These are to all intents and purposes **occupational diseases**, which **can and must be prevented**.

Thanks to the comprehensive treatment offered by Protex creams, **the safety of workers and the health of their hands will no longer be a concern.**

All our products are **specially designed** to meet the professional needs of workers, **dermatologically**

tested and certified by an independent laboratory to ensure their dermoprotective and healing qualities.

Choose Protex creams and **protect the health** of your workers.

PROTECTION

BEFORE WORK

PROTECTIVE BARRIER CREAM FOR HANDS AGAINST OILY AND GREASY SUBSTANCES. WATER-SOLUBLE

Protexsol Professional is the hand cream specially designed for protection from **contact with oily substances**.

This water-soluble dermoprotective ointment, with special emulsifiers with excellent **skin tolerability**, reduces the adherent effect on the skin of non-water-soluble work substances and **facilitates cleaning from the most difficult dirt**.

It contains high percentages of inorganic compounds that form a **protective film on the skin**, limiting the absorption of harmful substances into the outer layers of the skin.

PROTECTS FROM

Oils, grease, lubricants, metal powder, graphite, carbon black, paints, lacquers, solvents, glue, resin, fibreglass.

FIELDS OF APPLICATION

Maintenance & engineering, automotive workshops, metal carpentry, roofing, plumbing, carpentry, windows and doorfitter, coachbuilders, painters.

PROTECTIVE BARRIER CREAM FOR HANDS AND FACE AGAINST WATER-BASED SUBSTANCES. WATER INSOLUBLE

Protexins Plus is the hand and face cream that protects and regenerates the skin barrier in the **wettest working conditions**. It is also suitable in the food industry because it does not contain dyes, silicone or perfume.

Its **innovative recipe**, thanks to its multiple emulsifying system, provides **protective and regenerative properties**. The dermoprotective effect is based on the regenerative barrier properties of the oils, the moisturising, emollient and nourishing properties of bisabolol and the astringent properties of tannin and hamamelis. These features make it possible to **reduce skin maceration** even under very occlusive work clothes or safety devices.

PROTECTS FROM

Weak acids, alkalis, water-based solutions, water-based dyes, salts and detergents, cement, lime, fertilisers, occlusive clothing.

FIELDS OF APPLICATION

Chemical industry, construction, mechanical engineering, food and catering, horticulture, gardening, trichology, hairdressing.

HYDRATION

AFTER WORK

Protexsun Protection

SUNSCREEN FOR HANDS, FACE AND BODY AGAINST UVA AND UVB RAYS. SPF 50

Protexsun Protection is the sunscreen against UVA and UVB rays with a **high protection rating**.

This silicone, dye and paraben-free cream is enriched with emollients and suitable for face and body.

Thanks to its glycerine, creatine and vitamin E content, **it counteracts early skin ageing**. From a dermoprotective point of view, it helps prevent erythema, redness and sunburn, and absorbs quickly without greasiness.

Designed for **professional use**, it has a light fragrance and keeps the skin soft and supple.

PROTECTS FROM

Solar and artificial ultraviolet UVA and UVB rays.

FIELDS OF APPLICATION

Outdoor work (solar UV), employees welding, medicine (UV lamps) and industry (artificial UV).

Protexem Rinnova

MOISTURISING AND SOFTENING CREAM FOR HANDS AND FACE

Protexem Rinnova is the hand and face cream with extraordinary **emollient and nourishing effectiveness**.

It penetrates the skin quickly without irritating residues. Thanks to its properties, it soothes irritations and **strengthens the natural regeneration of the skin**.

Its regular use helps keep the skin smooth and soft, **preventing chapping and dryness**, the cause of many occupational skin diseases.

Regular daily use is essential, at the end of the activity.

PROPERTIES

- Nourishes and cares
- Calming effect on stressed skin
- Absorbs quickly
- Silicone-free

FIELDS OF APPLICATION

Recommended for all activities.
